Larry Ketchum, an Albion College alumnus, manually changes the programing on AMICO's IBM 1440 computer.

The dimension of the cast metals industry today, which is constantly enlarging and expanding with the introduction of new concepts and techniques, can be primarily attributed to the high quality of the young men who are entering the industry. The college graduate who accepts the challenge of a career in founding bears a great responsibility in solving the complex problems within the framework of a 20th century technology.
